

Service Areas

ROAD SERVICE AREAS

Service areas have been established by the Borough within certain neighborhoods for the purpose of providing sewage disposal, street lights, and road maintenance and construction. The revenues for these services are provided by local taxation, state shared revenue, interest, and specific grants.

To date, service areas have not been required to cover the full cost of supporting the services provided by the Borough. The FY 2005 continues the partial charge established in FY 2000 whereby these service areas began paying for approximately 50% of their five-year moving average of actual support costs, an increase over the previous amounts charged.

FIRE SERVICE AREAS

Fire service areas are formed within a geographic area to provide fire protection and rescue services to Borough residents. Currently there are five fire service areas that protect approximately 88% of the residents not serviced by the cities. The cost of Borough services is minimal and has not been fully recovered. In FY 2001 the Borough transferred all maintenance cost for fire station facilities onto the service areas.

SERVICE AREA REVENUE

Property Tax – All taxable real property within a service area boundary is subject to ad valorem taxation; a tax based on value, at a rate recommended by the Service Area Commissioners and approved by the Assembly. Approximately 95% of all service areas have a tax levy to support their operations. As years go by, and as State funding has steadily declined, the number of service areas that tax themselves has steadily increased. Imposition of new or increased taxes can only be achieved through a local election authorizing an adjustment upward of each service area's tax revenue cap.

Interest Earnings – Beginning in FY 1990, Service Areas were eligible to accrue interest from their share of the Borough's Central Treasury cash balances. The estimated interest rate for FY 2005 revenue is 1.7% based on current invested balances and market conditions.
