

DISTRICT COUNCILS

Ordinance 2004-69 created six Service Area District Councils. The district council concept encourages service areas to meet collectively to share experiences, learn from each other and allows the gathering and communication of common or widespread problems, goals, and concerns to the Mayor and Assembly.

Collectively the six district councils: Salcha, Badger, Chena Hot Springs Road, Farmer's Loop, North Borough, and West Borough, encompass most of the Borough's geographic area.

The chair of each service area located within the District Council geographic boundary shall appoint one of the service area commissioners or a representative from their road service area who is not a member of the commission, to serve on the District Council at the pleasure of the appointing service area commission. (FNSB 14.02)

DISTRICT COUNCIL RESPONSIBILITIES

- A. Prioritize and make recommendations to the mayor and assembly about the district's upgrade and maintenance needs.
- B. Explore possible cost savings using collective purchasing power.
- C. To make recommendations to the mayor and the assembly regarding needed changes or other solutions to problems experienced by service areas within the district.
- D. Promote communication within the service areas in the district and between the service areas and the mayor and assembly.
- E. To communicate with other councils

District Council meetings are advertised on the Borough News page in the Fairbanks Daily News Miner and listed on the Borough's website under Public Notices. Meetings are held quarterly and do not have quorum requirements.

Each District Council shall appoint one representative to the Assembly Road Service Area Committee.
