

Accessing Live Air Quality Data from the Borough Website

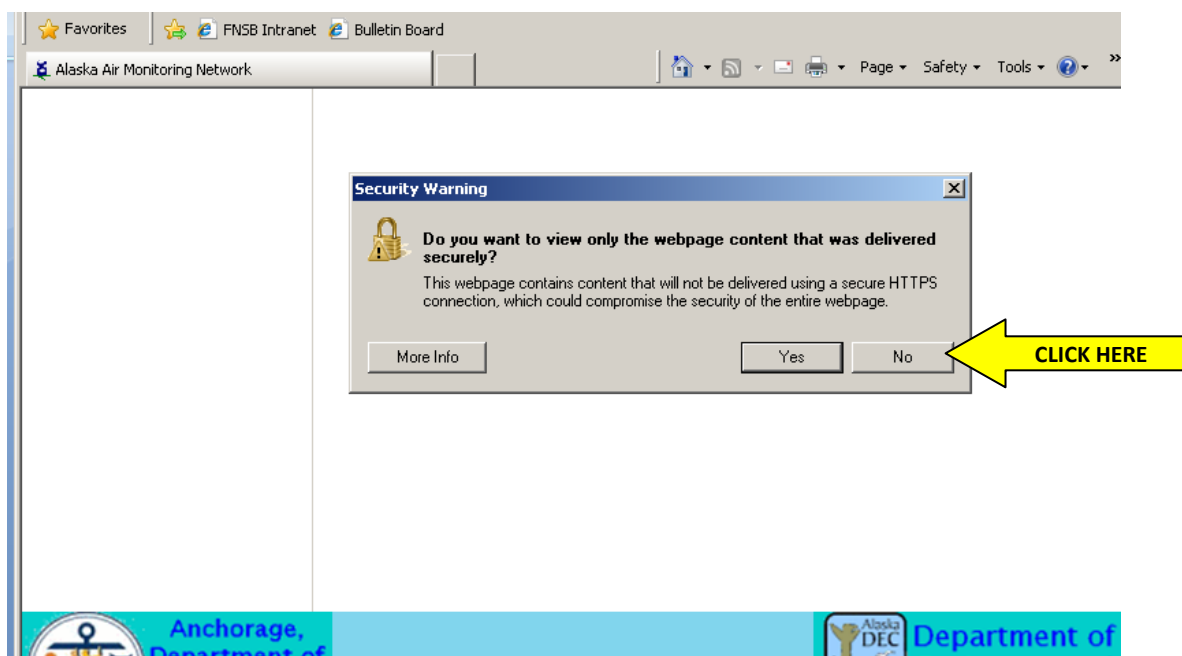

(Created 1-3-11)

1. Go to www.fnsb.us/airquality and click on the orange and white "Live Air Quality Data – FNSB AQ Monitoring" link on the right hand side of the page.

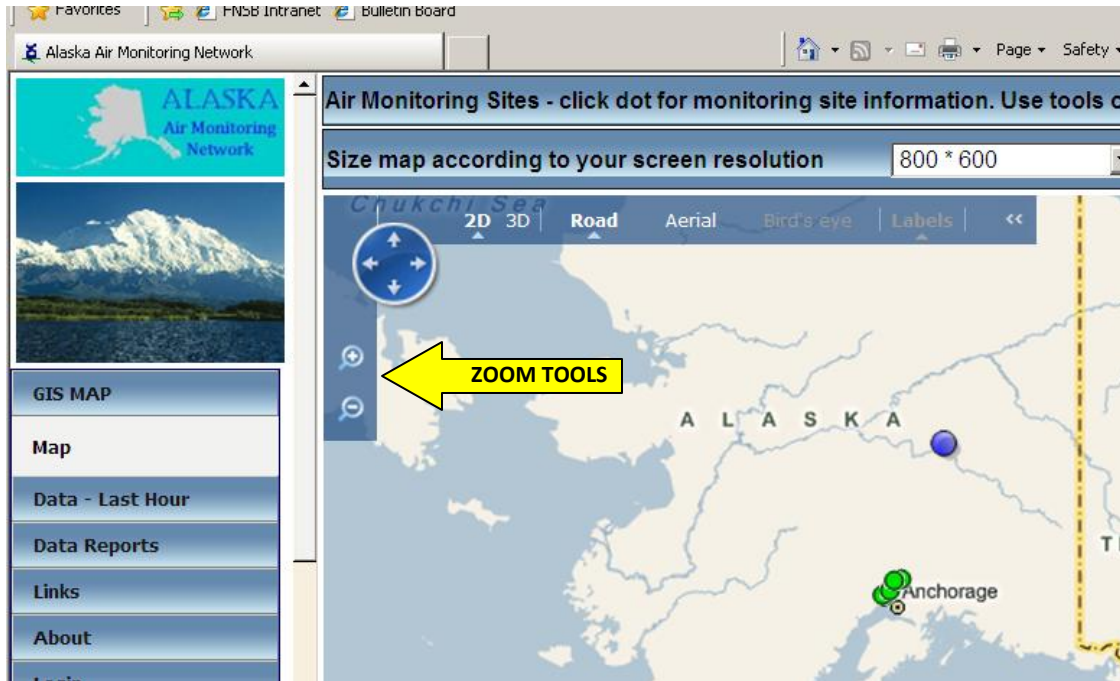

The screenshot shows the website for the Fairbanks North Star Borough Air Quality Program. The page features a header with the borough name and contact information. Below the header is a section for the Air Quality Index (AQI) for Friday, December 31, 2010, which is currently "GOOD". The AQI is represented by a color-coded bar with categories G (Good), M (Moderate), USG (Unhealthy Sensitive), U (Unhealthy), V (Very Unhealthy), and H (Hazardous). The current AQI is in the "GOOD" category, which is highlighted in green. Below the AQI, there is a text box explaining the current status and providing information about Carbon Monoxide and Particulate levels. To the right of the AQI section, there is a "Links" section with several hyperlinks. A yellow arrow points to a red and white button labeled "LIVE AIR QUALITY DATA" with "FNSB AQ MONITORING" below it. Another yellow arrow points to the text "CLICK HERE" next to the button. Below the button, there is a link for "Contact Air Quality".

2. Click "NO" when you see a Security Warning box pop up.

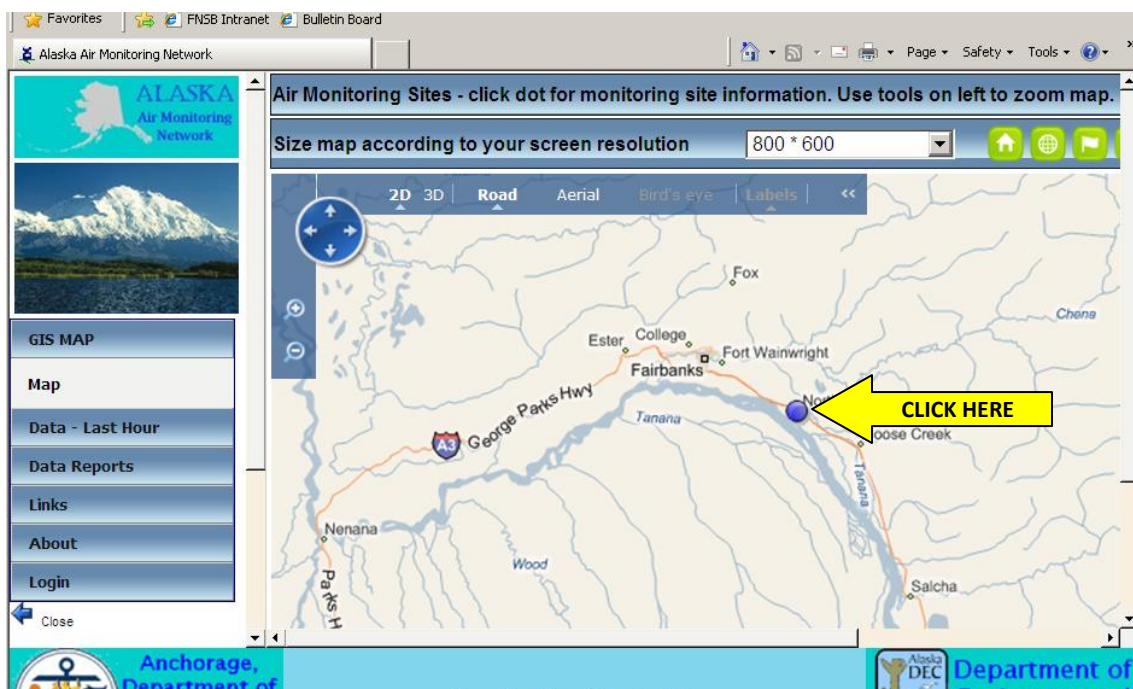

The screenshot shows a Security Warning dialog box that has popped up over the website content. The dialog box has a title bar that says "Security Warning" and a close button (X). The main text of the dialog box asks: "Do you want to view only the webpage content that was delivered securely?" Below this question, it explains: "This webpage contains content that will not be delivered using a secure HTTPS connection, which could compromise the security of the entire webpage." There are three buttons: "More Info", "Yes", and "No". A yellow arrow points to the "No" button, with the text "CLICK HERE" next to it. The background of the website is partially visible, showing the Alaska Air Monitoring Network logo and the Alaska Department of Environmental Conservation logo.

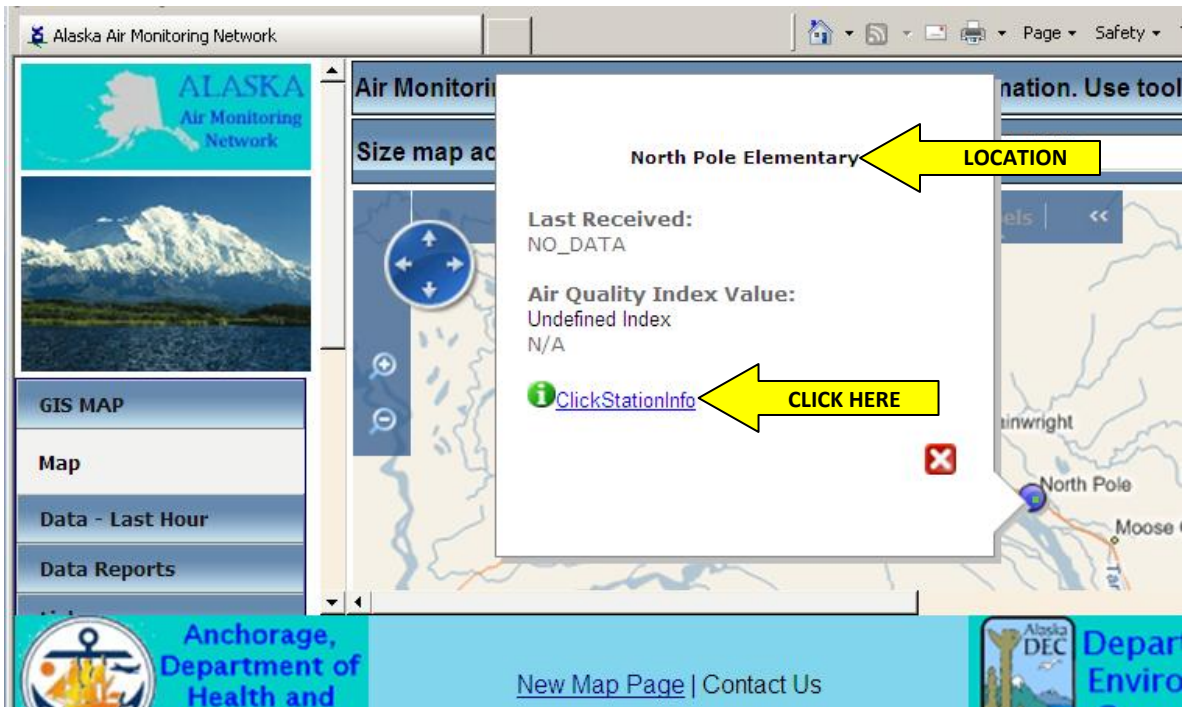

3. A map of Alaska will appear with dots showing the locations of the air monitoring stations. You can use the zoom tools on the left side of the screen to zoom in on the Fairbanks area.

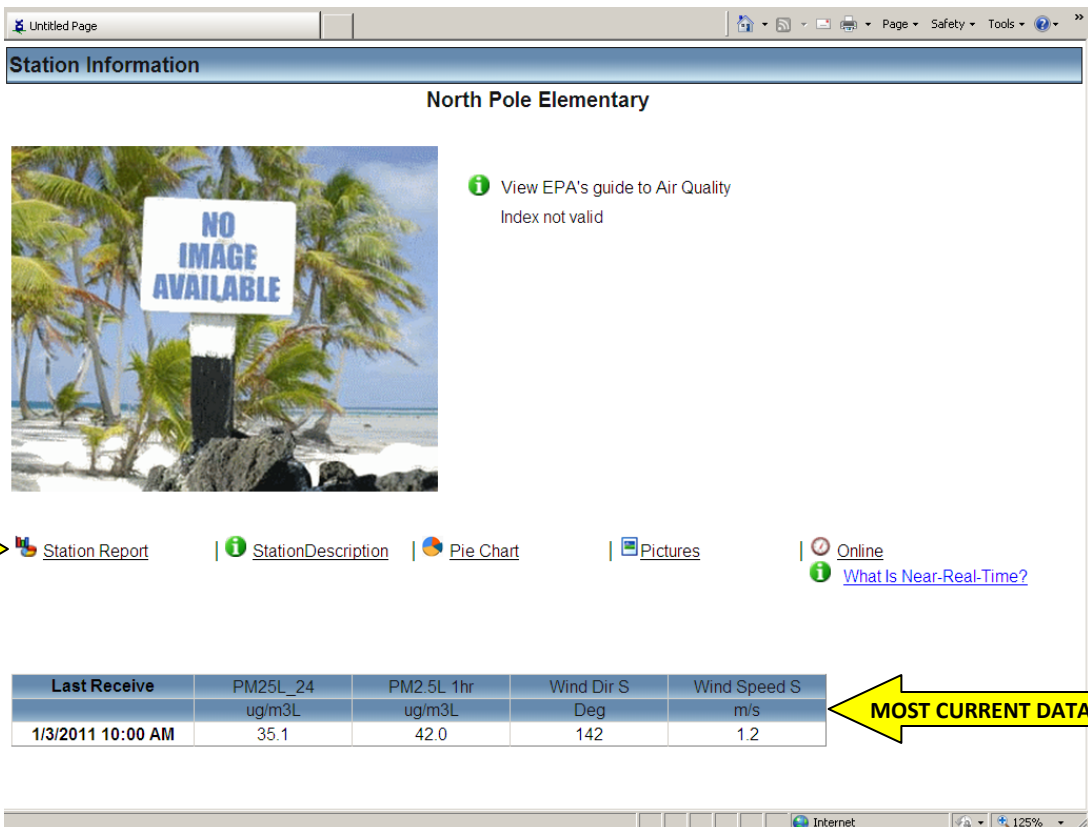

4. Click on the dot that you are interested in.

- You will see a screen pop up with the location at the top. Click the "ClickStationInfo" link to see the data.

- The most current data will appear towards the bottom of the screen.

- If you want to view a report, click on "Station Report," type in the criteria you are interested in and click "Generate Report."
